Registration Form – Record of Changes

1. Project Information

Project code	FA26SE153
Project name	HR Connect: AI-Powered Recruitment & Affiliate Headhunting Platform
Team	Trương Hoàng Quí (Leader), Khúc Ngọc Sơn, Cao Hữu Trí, Lê Thị Trà Mi, Nguyễn Văn Sang
Supervisor	Phạm Minh Trí (tripm14@fpt.edu.vn)
Current registration version	1.0 (19/08/2026)
Proposed version	2.0
Version	1.1
Date	27/10/2026

2. Changes

☐ No changes to the current registration form

No.	Section	Current content	Proposed content	Reason	Proposed by
1	3.2.b Human actors	One actor "System Administrator (Admin/HR)" approves companies and jobs, reviews candidates and manages payouts.	Two actors: Internal HR (job review, screening, Sourcing delivery, resignation verification, service agreement) and Platform Admin (company/affiliate approval, roles, settings, fee and payout records, disputes). Internal HR does not submit CVs on behalf of candidates.	Separation of duties found in Iteration 1; finance actions must not be done by the screening role.	Trương Hoàng Quí
2	3.2.c Workflow & Interview; Partner & Finance	Offer (OB) and probation (PP) tracking; commission calculated at probation passed / contract signed.	No probation tracking. HEADHUNT_COD placements have a configurable warranty (default 30 days); commission is earned when the warranty passes and becomes payable after the Client pays. CV_SOURCING pays commission per accepted CV. A confirmed resignation in warranty opens a free replacement slot.	Business rule agreed with the partner (team decision 17/10/2026).	Trương Hoàng Quí
3	3.2.c Job Management	Job status Draft / Active / Paused / Closed; public or affiliate-only visibility.	Job lifecycle DRAFT → PENDING_REVIEW → (PENDING_AGREEMENT) → (PENDING_PAYMENT) → ACTIVE → PAUSED / CLOSED, plus REJECTED. Visibility and submission rights are configured per role and service type (can_view / can_submit).	Posting fee, Sourcing deposit and service agreement must be completed before a job goes live; finer access rules found in Iteration 1.	Trương Hoàng Quí
4	3.2.c Job Management (new)	—	Service Agreement for HEADHUNT_COD and CV_SOURCING: HR sends a versioned agreement, Client accepts or requests changes, the	Partner requirement: commercial terms must be agreed and	Trương Hoàng Quí

			primary contact signs with an e-mail OTP and the signed PDF is stored privately.	signed before work starts.	
5	3.2.c Application & CV Management	Automatic duplicate check by email/phone.	Duplicate check by normalised e-mail/phone plus candidate consent by e-mail for every affiliate referral (accept / decline / expire), and source disputes resolved by Platform Admin (UPHELD / REJECTED).	Vietnam Personal Data Protection Decree: a candidate must agree before an affiliate shares the CV; disputes needed to settle ownership.	Trương Hoàng Quí
6	3.2.c AI Matching Engine; 3.2.e Theory	Must-have / Should-have keyword sets for automatic pre-filtering; TF-IDF/embedding similarity.	Every MUST_HAVE / SHOULD_HAVE requirement is assessed by an LLM (Gemini, configurable) with evidence quotes that are verified against the CV, combined with Sentence-BERT similarity into a score and colour tier. Scoring is asynchronous with retry.	Iteration 1: keyword filtering missed synonyms and gave unexplained results; evidence-based assessment is explainable to HR.	Trương Hoàng Quí
7	3.2.d NFR Performance	AI matching score for a single CV/JD pair computed within 5 seconds.	AI scoring runs asynchronously; 95% of applications are scored within 60 seconds after submission (see Design Brief NFR N2).	Measured LLM latency in Iteration 1 is above 5 s per call; asynchronous scoring keeps the user flow fast.	Trương Hoàng Quí
8	3.2.e Technologies	ReactJS with Material UI; MinIO/S3 storage; Docker Compose; 4-person team.	React + TypeScript with Ant Design and Tailwind CSS; Cloudflare R2 (S3-compatible) storage; Resend e-mail; deployment on Render (backend), Vercel (frontend) and GitHub Actions CI; team of 5 members.	Hosting and cost constraints; 5 members are registered in section 2 of the form.	Trương Hoàng Quí
9	3.2.c Workflow & Interview	Interview scheduling and outcome notes (Pass / Fail / Backup).	Interview rounds with reschedule/cancel history and NO_SHOW; versioned offers (HEADHUNT_COD must use gross monthly salary, withdrawal needs a reason, offers expire); start-work confirmation creating the Placement, or "not started" with no fee.	Iteration 1: the hiring outcome between interview and placement must be recorded to trigger fees, warranty and commission.	Khúc Ngọc Sơn
10	3.2.c Workflow & Interview; Partner & Finance (new)	—	Placement reconciliation for HEADHUNT_COD: Internal HR verifies the start-work outcome reported by the Client (PENDING → CONFIRMED / FLAGGED); the service fee becomes DUE only after CONFIRMED; Platform Admin resolves FLAGGED cases.	Iteration 1 / partner constraint: fees and commissions must not rely only on the Client's own report of the hire.	Khúc Ngọc Sơn
11	3.2.c Application & CV Management	Automatic duplicate check by email/phone.	A candidate the Client already hired or processed within a configurable period (mf02.client_ownership_days, default 30) is blocked as	Partner requirement: avoid paying commission for candidates the	Cao Hữu Trí

No.	Section	Current content	Proposed content	Reason	Proposed by
			CANDIDATE_OWNED_BY_CLIENT, so no affiliate commission is created for it.	Client already owns.	
12	3.2.b Candidate; 3.2.c AI Matching Engine	Candidate receives AI-generated job-fit notifications.	Explainable job recommendations: active jobs are ranked for a candidate from the public profile and primary CV using the AI v2 semantic-match service; a JOB_FIT notification is sent; private profiles see an empty state.	Iteration 1: notification alone was not useful without the reason a job fits; candidate privacy setting must be respected.	Trương Hoàng Quí
